Ashish Gupta

Senior Software Engineer | Distributed Systems & Applied AI

Vienna, Austria | (+43) 6608285746 | gupta.s.ashish95@gmail.com | Rot-Weiß-Rot-Karte Plus (RWR+)
linkedin.com/in/ashishgupta95 | github.com/ashishgupta95 | ashishgupta95.github.io

Senior Software Engineer with 9+ years of experience architecting enterprise distributed systems, high-performance web applications, and mission-critical microservices across Testing, BFSI, Supply Chain, and Energy sectors. Expert in full-stack engineering with C#, .NET 8, TypeScript, and SQL, alongside production systems delivery in Rust and Java. Proven track record building event-driven pub/sub pipelines, 100+ GB high-precision data reconciliation engines, and production AI integrations including custom Model Context Protocols (MCPs). Living in Vienna with unrestricted Austrian labor market mobility under Rot-Weiß-Rot-Karte Plus (RWR+).

SKILLS & TECHNOLOGIES

- Languages & Runtimes: C#, TypeScript, Rust, SQL (T-SQL, PostgreSQL), JavaScript, Java, Python.
- Backend & Distributed Systems: .NET 8, ASP.NET Core, Entity Framework (EF Core), Web APIs, gRPC, SignalR (WebSockets), Azure Service Bus (pub/sub), Event-Driven Architecture, Microservices.
- AI & Agentic Systems: Model Context Protocol (MCP) servers (JSON-RPC, stdio & HTTP), LLM Tool-Calling APIs, Natural Language-to-SQL (NL-to-SQL), Automated Schema Discovery.
- Cloud, DevOps & Observability: Azure Cloud, Docker, Kubernetes, Helm Charts, Azure DevOps CI/CD, GitHub Actions, OpenTelemetry (Distributed Tracing), Infrastructure as Code (NUKE), Snyk.
- Frontend & Tooling: React, Angular, RxJS, Next.js, Monaco Editor, Vite, Nx Monorepo, AG-Grid, Tailwind CSS, Material UI (MUI).
- Databases & Data Formats: SQL Server, Fluent Migrator, MongoDB, SQLite, Apache Parquet, Avro, Apache Hive, Azure Blob Storage (100+ GB high-precision reconciliation).
- Testing & Quality Engineering: Test-Driven Development (TDD), Behavior-Driven Development (BDD), SpecFlow, xUnit, Unit & Integration Testing, End-to-End Testing, Jest, Playwright.

PROFESSIONAL EXPERIENCE

Tricentis — Senior Software Engineer

Vienna, Austria | June 2024 – Present

- AI-Powered Product Integration & MCPs: Engineered and delivered custom Model Context Protocols (MCPs) bridging LLMs with hybrid cloud and on-premise test environments, establishing automated schema discovery, Natural Language-to-SQL synthesis, and automated test-case generation to slash authoring friction for enterprise clients.
- Decoupled Event-Driven Messaging & Real-Time Sync: Architected an enterprise pub/sub messaging pipeline using Azure Service Bus, a dedicated Notification Service, and SignalR (WebSockets), propagating state updates and automated MCP tool calls to web clients with debounced re-fetch and live UI refresh.
- 100+ GB Data Reconciliation Engine: Maintained and optimized the Tosca DI row-by-row comparison engine, reconciling 100+ GB datasets with high precision across SQL databases, Apache Hive, and heterogeneous file formats (CSV, Excel, Parquet, Avro).
- Enterprise Test Intelligence Dashboard: Built a GitHub Actions post-execution reporting pipeline and interactive dashboard for 1,396+ nightly regression test runs, scaling adoption across 19 engineering teams as the primary daily standup failure-triage platform.
- High-Performance Desktop Tooling: Maintained and enhanced a mission-critical desktop reporting tool, utilizing Rust for low-latency, memory-safe data processing paired with an Electron frontend.
- Interactive SQL Playground & UI Tooling: Engineered a web-based SQL playground micro-frontend using Monaco Editor, enabling users to format and execute live queries with real-time syntax validation, IntelliSense, and low-latency result rendering.

International Atomic Energy Agency (IAEA, via e-Zest) — Senior Software Engineer

Vienna, Austria | April 2023 – May 2024

- Mission-Critical Safeguards Tooling: Architected and enhanced core components of the SAFIRE reporting application (.NET Core, Angular, SQL Server) and integrated auxiliary inspection systems, ensuring high availability for international nuclear inspectors worldwide.
- Quality Engineering & Verification: Applied TDD and BDD methodologies to deliver 10+ core inspection features, strengthening automated verification frameworks and reducing data validation errors by 25%.
- Stakeholder & Inspector Workflow: Partnered directly with nuclear inspectors and domain stakeholders to translate inspection workflows into automated reporting features and seamless auxiliary integrations.

PROFESSIONAL EXPERIENCE (CONTINUED)

LTIMindtree — Module Lead Mumbai, India | April 2021 – April 2023

- Compliance Engineering: Engineered a full-stack Remote Worker Assessment web application for Deloitte (U.S.) using .NET and Angular, guaranteeing 100% regulatory compliance across 15+ international labor laws.
- System Architecture & Decoupling: Drove microservices decoupling, secure RESTful API development, and database query optimization, reducing latency across core assessment pipelines.

GEP Worldwide — Senior Software Engineer (Promoted from SE in 12 mos) Mumbai, India | September 2019 – April 2021

- Logistics Visualization & Telematics: Integrated Azure Maps with the enterprise Control Tower UI, delivering real-time shipment tracking that reduced client inquiry queries by 25%.
- Reusable UI Frameworks & Analytics: Architected reusable dashboard components across Demand Planning projects, enabling high-performance visualization for complex historical and forecasted datasets.
- Data Strategy & Ingestion: Designed high-performance data ingestion pipelines and visualization mechanisms utilizing NoSQL database architectures for high-volume supply chain transactions.

TSS Consultancy — Jr Software Engineer Mumbai, India | April 2018 – September 2019

- Cryptography & Financial Security: Built banking security modules utilizing Public/Private key cryptography and digital certificates across Java and .NET environments, eliminating data-in-transit vulnerabilities.
- CRM Database Consolidation: Architected a consolidated customer relationship management application unifying fragmented datasets into a single, high-integrity transactional database.

AUM Insurance Brokers — Software Engineer Mumbai, India | June 2017 – April 2018

- E-Commerce & API Integration: Built TakeAPolicy.com, a public-facing insurance portal integrating vendor REST APIs for real-time policy comparisons, automated premium calculations, and secure payments.

EDUCATION

Bachelor of Computer Science — University of Mumbai Mumbai, India | 06/2012 – 05/2016

LANGUAGES & LEGAL WORK AUTHORIZATION

- Languages: English (Full Professional Proficiency, C1/C2), German (A1/A2), Hindi (Native).
- Work Authorization: Rot-Weiß-Rot-Karte Plus (RWR+) — Unrestricted Austrian labor market mobility with full employer portability and zero sponsorship requirements.

AWARDS & ACCELERATED ADVANCEMENT

- Rapid Advancement at Tricentis: Formally promoted to Senior Software Engineer in January 2026 within 19 months of joining, recognizing impactful engineering contributions across cloud microservices, desktop tooling, and AI agent initiatives.
- Accelerated Promotion at GEP Worldwide: Formally promoted from Software Engineer to Senior Software Engineer within 12 months of tenure (Q4-2020) for driving delivery on critical supply chain visibility tools.
